

Scrubber Driers - Twintec Cable - TT4550S

When the areas to be cleaned get a little bigger, and quite often the time available gets a little shorter, this is the moment when practical innovation comes into its own.

With plenty of surplus power available within the standard motor and transmission design we have been able to enlarge the brush size and increase the operating efficiency whilst still maintaining a machine that is exceptionally easy to use.

Water capacity is up by 33% and the cleaning path by 20% over the 3450 size and yet to use the machine you would never know.

The 4550 has all the classic practical features of the smaller machines with its full stainless steel chassis, heavy duty motor and gearbox, powerful Twinflo' suction system, polyform water tanks, efficient semi-parabolic, polyurethane collection system and fully adjustable operating handle and control centre.

Specifications

Brush Motor Power	1000 W
Vacuum Motor Power	1200 W
Diameter	550 mm
Speed	50Hz=150rpm 60Hz=180rpm
Capacity	40 L
Cleaning Range	26.8 m
Weight	68 kg
Size	1150x1110x850mm
Cleaning Area	5000- 6000 m ²
