

TYLER HIRE

Construction

High-pressure cleaning solutions for heavy construction equipment

Because clean equipment lasts longer, pressure washing protects your investment by blasting mud, grease and grime from heavy equipment faster and deeper than any other cleaning method. These are idea for companies with heavy equipment, flatwork clean up, tilt wall, bridge construction, aggregate cleaning, restoration work, etc.

Pressure washers are commonly used to clean:

- Bulldozers
- Backhoes
- Driveways
- Paint preparation
- Cement mixers
- Forklifts
- Scaffolding
- Air handlers
- Kilns

Transportation

High-pressure cleaning solutions for trucks, cars, trains and planes

Because vehicles—especially fleets—serve as a company’s “rolling billboard,” Landa offers a broad selection of pressure washers—hot and cold water, high and low pressure, etc.— as well as detergents engineered specifically for companies with tractor-trailer rigs, dump trucks, cargo vans, fire trucks, refuse haulers, school buses, flat bed rigs, etc.

Pressure washers are commonly used to clean:

- Aluminum trailers
- Forklifts
- Ladder, racks
- Radiator grill
- Fifth wheels
- Exhaust stack
- Asphalt removal
- Fuel tanks
- Cargo holds

TYLER HIRE

Mining-Drilling

High-pressure cleaning solutions for mining-drilling equipment

Because rigs and equipment must be kept clean for optimum performance, Landa offers a broad selection of hot water pressure washers built to the rugged specifications of companies involved in mining, drilling, quarry excavation, oilfield service, frac tank service, wireline service, etc.

Pressure washers are commonly used to clean:

- Mixing augers
- Blocks, hooks
- Engines, radiators
- Locomotives
- Shotcrete machines
- Exhaust stack
- Excavators
- Elevator links
- Shovel, loaders

Institutions

High-pressure cleaning solutions for institutions

Because facilities and machinery must be kept in tip-top shape and must meet cleanliness standards, Landa offers a broad selection of pressure washers designed to meet the needs of restaurants, resorts, hotels, hospitals, rendering plants, food processing facilities, etc.

Pressure washers are commonly used to clean:

- Swimming pools
- Hoods and vents
- Walls, doors, windows
- Wheelchairs
- Lawn equipment
- Tables and chairs
- Trash containers
- Air handlers
- Machinery

Upscale Homes

High-pressure cleaning solutions for upscale homes

Commercial-grade pressure washers can be ideal for upscale homes because they offer hot water that cleans faster than cold water, they are electrically powered (no need to store gasoline), and plug-and-wash systems allow you to clean outdoors like a central vacuum system cleans indoors.

Pressure washers are commonly used to clean:

Pools and decks	Kennel cleaning	Gutters and
Playground	Motor bikes	soffit
equipment	Vehicles, light	Water
Walls, doors,	equipment	features
windows		Patio
		furniture
